

CONTACTLESS PATIENT PAYMENTS

A MOBILE SOLUTION FOR FASTER, SAFER COLLECTIONS

Costly, cumbersome paper statements and antiquated patient payment processes are a thing of the past. The new reality from Liquid Payments is an efficient, mobile-based solution for contactless payments and improved overall collections. The platform delivers a modern, end-to-end patient-payments experience, using the latest payment terminals in-office as well as remote payment options.

No more waiting to bill patients or time-consuming invoicing procedures. The Liquid Payments' mobile statement and text-to-pay features, along with secure card-capture, provides a simpler, quicker way to collect payments, notifying patients of balances due and enabling a fast, mobile response. Safe and secure payments can be made with ease and convenience from any smart device, anywhere, anytime.

The Liquid Payments solution also leverages RPA (Robotics Processing Automation), an AI-based technology which creates operational efficiencies by enabling integration with any underlying EMR/ practice management system. This facilitates automatic posting of payments into patient accounts as well as an improved process for capturing balances due.

LIQUID PAYMENTS KEY ADVANTAGES

- Contactless payment options
- Supports Telemedicine and Telehealth
- Fast, convenient payments with mobile devices
- Eliminates paper statements
- Seamless integration with existing EMR/ EHR or practice management system
- Faster processing of hard to collect patient balances
- Safe and secure
- HIPAA and PCI-compliant

LEARN HOW OUR PLATFORM CAN HELP

- Reduce errors and costs
